SURGERY AND ANCILLARY PROCEDURES**

Academic calendar 2016-2017

HANDS-ON CADAVER INTENSIVE COURSE IN ORTHOGNATHIC SURGERY AND ANCILLARY PROCEDURES

The treatment of dento-maxillofacial deformity with orthognathic surgery has undergone a profound revolution during the last years. The reach - and hence the objectives - of this kind of surgery have been redefined to cover three basic pillars: the correction of the underlying malocclusion and skeletal base discrepancy, upper airway management, and harmonization of facial esthetics. This hands-on course aims to provide participants with a comprehensive practical overview of all techniques of the orthognathic surgery spectrum, including ancillary procedures to optimize esthetic results.

PROGRAMME

CLINICAL ANATOMY

Accelerated orthodontics:

- Corticotomies

Maxillary osteotomies:

- One-piece LeFort I osteotomy
- Segmented (three- or four-piece) Le Fort I osteotomy
- SARPE
- Minimally invasive protocol: "Twist technique"

Mandibular osteotomies:

- Sagittal split osteotomy
- Anterior segmental osteotomy (frontblock)
- Genioplasty
- Chin wing

Malar osteotomies:

- Sandwich osteotomy

Ancillary procedures:

- Rhinoplasty
- Bichat buccal fat pad transposition
- Facial liposculpturing techniques

FACULTY

COORDINATION

Dr. Federico Hernández-Alfaro
Dr. Adaia Valls Ontañón
