AOCMF Course—Advances in TMJ Surgery 'The Bonn Concept' (with Human Anatomical Specimens)

September 28–29, 2017 Leipzig, Germany

Course director

Rudolf H Reich

Dept. of OMFS University Hospital Bonn
Bonn, Germany

Course chair

Marcus Teschke

Dept. of OMFS University Hospital Bonn
Bonn, Germany

Course description

The topics of the course will be discussed during two days and taught in three main ways. Comprehensive lectures on the first day will concentrate on the understanding of the core material. On the second day, hands-on training on Thiel- fixated human specimens will cover specific surgery techniques. At the beginning of each surgical section, a short lecture and a demonstration by an instructor will be given. In order to link the lecture material and practical skills taught with the problems encountered

in daily practice, participants will have an opportunity for discussion with the instructors and the audience after each hands-on exercise section.

Target participants

This course is aimed at fully qualified medical specialists in advanced surgical management of TMJ patients in (with at least 3 years of experience).

Course objectives

After the course, participants should be able to:

- Examine TMJ patients effectively
- Indicate appropriate diagnostics
- Select patients for surgery
- Select specific surgical procedures
- Use surgical skills in daily practice
