

# Program 5<sup>th</sup> AOCMF Flap Raising Course Hands-on Practice on Human Specimens October 16–18, 2013 Vienna, Austria

# Mission

Our mission is to continuously set standards in postgraduate medical education and to foster the sharing of medically guided expertise in a worldwide network of healthcare professionals to improve patient care in trauma or disorders of the musculoskeletal system.

# The AO Principles of fracture management

Fracture reduction and fixation to restore anatomical relationships.

Early and safe mobilization and rehabilitation of the injured part and the patient as a whole.

Fracture fixation providing absolute or relative stability, as required by the "personality" of the fracture, the patient and the injury.

Preservation of the blood supply to soft tissues and bone by gentle reduction techniques and careful handling.

# Welcome

On behalf of AOCMF and your local and international faculty, I would like to welcome you to this AOCMF course.

AOCMF is a worldwide multi-specialty community that serves as the voice and professional resource for craniomaxillofacial trauma and reconstruction. Our organization creates a forum for specialists who have common interests and enthusiasm in this field. It is our goal to encourage and inspire younger surgeons, such as residents, fellows, and early practitioners to pursue fulfilling careers in our field.

Education has always been a major pillar in AOCMF. Currently, more than 2500 surgeons participate in over 80 AOCMF courses worldwide per year. AOCMF Education is committed to remaining in the forefront of education and new developments as we strive to improve your educational experience with us.

We hope that your experience with us over the next few days will result in the acquisition of new knowledge, skills and understanding, which will translate into an improvement in the care that you are able to give your patients.

We also hope that, as a result of this course, you will wish to develop a longer term relationship with AOCMF and become a member of our community. Make this organization yours by bringing in your opinions and ideas. Enjoy the camaraderie of our network and help us maintain and expand the preeminent position that AOCMF enjoys worldwide.

Yours sincerely

Janun Schos

# Goal of the course

This event is designed to present the most commonly applied flaps for head and neck reconstructive surgery and to practice related knowledge on current flap-raising techniques.

# Course description

This three-day intensive course is a laboratory training on fresh frozen human specimens.

Each session will include a step by step introduction followed by an on-site demonstration.

## Course objectives

On completion of this course the participants will:

- know how to perform the most commonly applied flaps for head and neck reconstructive surgery
- have enhanced their surgical skills in harvesting a variety of flaps for head and neck reconstructive surgery
- have an improved understanding of complex anatomical structures

# Target audience

- · Maxillofacial surgeons
- Plastic and reconstructive surgeons
- · Surgeons of related disciplines
