

Clinical Digital Photography for Surgeons, Doctors and Dentists

31 October - 1 November 2013

RCS London

Clinical photographs are an extremely useful part of the clinical record in many areas of surgery and medicine. The ability to take, process and archive digital photographs is essential when hospital medical illustration departments may be unavailable or non-existent. This course will provide you with the knowledge and skills to produce accurate, high-quality digital photographs.

Course contents include

- Benefits of an accurate clinical photographic record.
- Choosing appropriate photographic equipment
- Fundamental techniques for archiving, storing, labelling and retrieving digital photographs
- Essential techniques for processing images

Who should attend?

All surgeons, doctors and dentists who would like to improve their knowledge and skills in digital clinical photography.

Course Fee

£395

Course Director

Mr Steve Langton

Consultant Oral & Maxillofacial Surgeon
East Lancashire Hospitals

Additional Information

If you are attending this course as a participant in a non-training grade, this course has been allocated **12 CPD points** counting towards your Continuing Professional Development.
