## NH14 - WELCOME MESSAGE

*In 1953 Prof. Hugo L. Obwegeser performed the First  
Bilateral Sagittal Split Osteotomy of the Mandible. Sixty years later...NH14*

The Symposium is dedicated to Prof Hugo L. Obwegeser

*Dear Colleagues and Friends,*

It gives us great pleasure to invite you to participate in an International Symposium, New Horizons in Orthognathic Surgery 2014 - **NH14** - in Ferrara, Italy, between February 28<sup>th</sup> and March 1<sup>st</sup> 2014. In Orthognathic Surgery we face major changes in our every-day practice, and these challenges will increase in the near future, because the extraordinary advances in technology applied to our profession are not only amazing but are becoming the standard of care as they result in improved outcomes for our patients. Success is directly related to the ability and consistency of the surgical-orthodontic team to achieve predictable, stable results. The hypothesis is that a successful result is directly related to the way we take our records and perform diagnosis and treatment planning, in accordance with basic general principles.

Today we have the opportunity to plan and treat 3-dimensional problems with 3-dimensional technology. We should enter into this new era with appropriate standards to ensure better results, instead of simply using these new tools, which will clearly demonstrate not only to us, but to everyone, what we do when we perform orthognathic surgery.

*NH14* will also be celebrating the 60th anniversary of the first sagittal split mandibular osteotomy which, when it was performed, on April 22 1953, by Prof. Hugo L. Obwegeser in Zürich, Switzerland, opened up new horizons in orthognathic surgery. He developed an operation that has allowed the repositioning of a protruded mandible into a more backward position. A field previously limited to surgery of the lower jaw to correct prognathism had been expanded to unlimited possibilities. Internationally famous speakers including the pioneer of this surgery and Guest of Honour, Professor Hugo L. Obwegeser, will be presenting lectures in the symposium on specific topics.

*NH14* represents an excellent updating opportunity to see the latest scientific developments, future trends and products through lectures and a trade exhibition. It would be a great pleasure to welcome you to Ferrara and to be your host, both scientifically and socially. We trust that you will find the scientific programme to be educational, the social program enjoyable, and the whole event rewarding.

We look forward to seeing you in Ferrara for an unforgettable Symposium and experience that will be remembered for years to come.

With best regards,

Professor Luigi Clauser M.D., D.M.D.  
Director and Chief, Department of Cranio Maxillofacial Surgery  
St. Anna Hospital  
University of Ferrara  
Ferrara, Italy

Dear Friend Luigi,

First of all I want to thank you for your kind Fax letter, that reached me a few days ago.

I am privileged by your kind offer to have the conference running in my honour. Of course I was the one who introduced almost all the procedures for correcting anomalies or abnormal positions of the maxilla and the mandible by rather safe standard procedures and also who introduced a transoral technique for the correction of chin anomalies.

I was also the first to produce and suggest a *simultaneous Le Fort III plus Le Fort I* in cases of severe hypoplasia and retromaxillism. Nowadays these techniques are executed every day in almost every country around the world to the benefit of the patients and also of a large numbers of surgeons. For that reason I consider your planned conference as a landmark in orthognathic surgery.

It will be, of course, a great honour for me to be present and perhaps also deliver a lecture on the most fascinating and complicated subject in orthognathic surgery.

On a similar symposium organized by Joachim in fall last year he asked me to talk about “*Pioneer Steps in Correcting Secondary Cleft Lip and Palate Deformities*”: In my opinion it was probably my best lecture I ever delivered. There is still plenty of time to organize your conference. So we will be in touch again.

With my thanks and compliments I remain in old friendship yours sincerely,

Hugo L. Obwegeser

*Zürich, February 12, 2013*
