5th Euregional Course on

Aesthetic and Reconstructive Surgery of the Face – Advanced Course

Fresh Frozen Cadaver Preparation

Maastricht / NL

March 28th - 29th, 2014

Limited Workshop Attendance

The course is pending for EACMFS credits

In conjunction with the **MUMC Maastricht**

5th Euregional Course on Aesthetic and Reconstructive Surgery of the Face / Advanced Course Maastricht, March 28th – 29th, 2014

Dear Colleagues,

Join us at the 5th Euregional Course on Aesthetic and Reconstructive Surgery of the Face which will focus on surgical approaches to the face and the dissection of facial soft tissues. Again we were able to assemble an outstanding international faculty to share their exceptional experience by a great variety of lectures and clinical presentations. Anatomical, clinical and practical considerations come to the fore: blepharoplasty, mid-face- and face-lift procedures, local skin reconstructive techniques, lip- and face reconstruction are the key issues of the course. **Special attention will be paid to the topographic anatomy of the face.** The audience gets the chance to discuss each surgical step with the surgeon, the anatomist and the faculty members.

Furthermore we offer the opportunity of a **dissection course with exclusively fresh frozen specimen.** The participants will be able to perform all desired procedures and surgical techniques comparable to the real theatre setting. We provide a detailed dissection manual with illustrative step by step instructions. Additionally each participant will have the chance of personal teaching by our team of experts. We will provide a professional, yet intimate atmosphere and are looking forward to welcoming you in Maastricht.

Peter Kessler/Roland Böckmann Gwen Swennen
MUMC Maastricht AZ Sint Jan Brugge-Oostende

Course Topics

- Anatomy of the face
- Anatomy of the skin
- The aging skin
- Approaches to the face under aesthetic aspects
- Dissection of the skin
- Dissection of the SMAS layers
- Lifting and suturing techniques
- Dissection of the facial nerve
- Dissection of local skin flaps
- Lip reconstruction

Course under the auspices of the S.O.R.G. Academy

Course Directors and Organization

**P. Kessler,
MD, DDS,
Professor**

**G. Swennen,
MD, DDS,
Professor**

**R. Böckmann,
MD, DDS**

University Clinic for Cranio-Maxillofacial Surgery
MUMC Maastricht
Postbus 5800

Distinguished Guest Faculty

A. Herrler, MD, PhD, Maastricht (The Netherlands)
K. Ingels, MD, PhD, Nijmegen (The Netherlands)
A. Lataster, MD, PhD, Maastricht (The Netherlands)
J. Camilo Roldán, MD, DMD, PhD, FEBOMS, Hamburg (Germany)

Program

Friday, March 28th, 2014

08:30 Registration

09:00 Introduction **Kessler**
09:30 Facial anatomy – part I **Lataster/Herrler**

- The skin – regional differences
- The lymphatic and vascular system – drainage of the face

10:30 Coffee break

Program

Friday, March 28th, 2014

10:45 Facial anatomy – part II **Lataster/Herrler**

- SMAS and mimic muscles – a functional system
- The facial and the trigeminal nerve – a good team
- The parotid gland from a topographic point of view

12:00 Discussion

12:30 Lunch break

13:30 Photo documentation in aesthetic surgery of the face **Kessler**

13:45 Facial Anatomy as a key issue in reconstructive and aesthetic surgery of the face **Roldán**

14:15 Facial Anatomy as a key issue in reconstructive and aesthetic surgery of the face **Roldán/ Kessler**

15:00 Coffee break

15:30 “Step-by-step” surgical technique towards brow-lift, face and neck-lift **Swennen**

16:30 Blepharoplasty – anatomy, incision lines, variations **Ingels**

17:15 The lips – an aesthetic entity of its own **Roldán**

18:00 Introduction to the cadaver dissection course **Böckmann**

18:15 Closing remarks

19:30 Get-together with the faculty –
Brasserie of the van der Valk Hotel

Saturday, March 29th, 2014 (limited attendance)

- Bus transfer from the van der Valk Hotel to the University MUMC
- Hands-on course with exclusively fresh frozen specimen
- Limited attendance/one specimen for two participants
- Personal teaching by the faculty with step-by-step teaching
- Incision/approaches for lifting procedures
- Dissection of the skin
- Dissection of the SMAS
- Dissection of the fasciae (superficial/innominate/deep) of the temporal muscle
- Dissection of the platysma
- Dissection of the facial nerve
- Dissection of the facial mimic muscles

Registration and Information
