

Intermediate Skills in Plastic Surgery: Facial Soft Tissue Reconstruction

30-31 March 2015

RCS London

The aim of this course is to develop operative skills in the selection, design and execution of a number of useful, common surgical flaps for reconstruction following excision of skin lesions. The basic principles will be practiced on mannequins with pig skin, and participants will then progress to more complicated procedures using unembalmed cadaveric heads.

Course content includes:

- Forehead and temple
 - Rhomboid/dufourmental flap
 - Forehead flap
- Lip and chin
 - V-Y flap
- Cheek & Ear
 - Hatchet flap
 - McGregor flap

Who should attend?

ST3-6 and SAS Grades

Course fee

£1000

Course Directors

Mr Ken Graham

Consultant Plastic Surgeon
Whiston Hospital, Merseyside

Miss Fiona Hogg

Consultant Plastic Surgeon
Ninewells Hospital, Dundee

Why take this course?

Many areas of the face present with multiple reconstructive options and this course will enable the delegate to better understand the decision-making and concepts behind flap planning, together with technical instruction in their execution.

Key learning outcomes include:

- Should demonstrate competencies in reconstructive procedures required after excision of major defects or after major trauma. This includes flap reconstruction including developing competence in microsurgical reconstructive techniques.
- Should demonstrate competencies in the management of skin malignancy and other soft tissue tumours.
