

10th Surgical Facial Access and Flap Course, Zürich

June, 11th- 13th 2015

Klinik für Mund-, Kiefer- und Gesichtschirurgie
UniversitätsSpital Zürich
Head:
Prof. Dr. Dr. med. M. Rücker

Anatomisches Institut
Universität Zürich
Head of Division Gross Anatomy:
Prof. Dr. Dr. med. O. Ullrich

Course Chairman:
Marius Bredell
BChD, MBChB, MChD, EBOMFS

Description of course

Dear Colleague

We would like to invite you to this, the 10th Surgical facial access and Flap course in the beautiful city of Zürich,

The course has in mind to assist surgeons working in the head and neck region in their daily work in a very practical way. The platform of well preserved wet cadavers (prepared in a way that makes dissection more life-like) will give all the participants the opportunity to review the practical surgical anatomy and perform a wide variety of procedures themselves in a less stressed and critical environment.

Participants will participate in either the **Facial Access or Free Flap course** according to their wish as indicated on their registration form. Later changes may not be possible. Lectures on surgical anatomy and approaches will be held together, but each participant will then either do the Facial Access **or** Free Flap practical. In this way there often is significant and interesting cross interaction between colleagues, leading to fruitful discussions.

Participants will work in groups of two each and will be able to perform the procedures themselves. Surgical instruments will be provided. The aim is to cover as much of the scope of practical Maxillofacial and Oral Surgery as possible.

Although lectures will be given before each practical session, pre-reading of relevant anatomy and techniques is strongly recommended. Participants are advised to bring their own anatomy textbooks along. Limited free dissection may be performed.

Yours sincerely

Marius Bredell (Course Chairman)

Faculty: Experienced Head and Neck and Reconstructive Surgeons

Provisional course programme:

11. June 2015

- 13:30 Introduction and Organisation
- Lecture Orbital Access as well as Radial Forearm Free flap.
- Practical Orbital access. Radial Forearm Flap**
- Lecture Temporomandibular joint access and Le Clerq, as well as Upper lateral thigh flap.

12. June 2015

- 08h15 **Practical Temporomandibular Joint exploration and Le Clerq procedure. Upper Lateral Thigh Flap.**
- Lecture Gillies Elevation, Zygoma hook and Positioning screw placement, as well as Coronal approach, as well as the DCIA Flap.
- Practical Gillies elevation, Zygoma hook, Coronal Approach to Zygoma and Nasal structures. DCIA Flap.**
- Lecture Parotid and Facial nerve and Rectus abdominis free flap.
- Practical Approach to the Parotid and Facial Nerve (Left side only) Rectus Abdominis Freeflap.**

Course Dinner

13. June 2015

- Lecture Neck access and Supraomohyoid Neck dissection as well as Fibula free flap.
- Practical Neck access and Supraomohyoid Neck dissection (left side) Fibula Freeflap.**
- Lecture Tracheostomy and condylar Plating via Intraoral route, Condy-lar access via Submandibular, Transparotid, Retromandibular access as well as Pectoralis Myocutaneous flap.
- Practical Tracheotomy and Plating of Condyle through Intraoral route, Submandibular, Transparotid, Retromandibular access. Pectoralis Major Flap.**
- Lecture Temporalis flap as well as Latisimus dorsi Free flap.
- Practical Temporalis Flap, Latissimus Dorsi Free flap Dissection (Cadaver rotated to side)**
- Lecture Local skin Flaps, Medial femur condyle Flap.
- Practical Local skin flaps, Medial femur condyle flap**
- 17h00 Cocktail and Closure
