

OPTIMISATION IN **CMF TRAUMA** CARE

INTERNATIONAL
SYMPOSIUM

May 19-20, 2016

Date

May 19-20, 2016

Venue

University Medical Center Groningen,
Groningen, the Netherlands

Main topic

CMF trauma: diagnosis and treatment

Organising committee

Fred K.L. Spijkervet
Baucke van Minnen
Lisa Kempers
Nienke Geurts-Jaeger

Scientific committee

Ruud R.M. Bos
Michiel H.J. Doff
Anne C. van Leeuwen
Baucke van Minnen
Boudewijn Stegenga

Organising secretariat

University Medical Center Groningen
Wenckebach Instituut
Postgraduate School of Medicine
Phone: +31 (0)50 3611402

In collaboration with

The Dutch Association of Oral and
Maxillofacial Surgery

We are honored to invite you to the international symposium

‘Optimisation in CMF Trauma Care’

This symposium is organised on the occasion of the retirement of professor Ruud Bos. During his career the hospital services around the traumatized patient have evolved from local habits to consequent use of the ATLS principles. At the same time CMF trauma care was revolutionised by computer tomography and the development of miniplate and microplate systems for internal fixation. In many CMF centers the traditional schools of rigid fixation and the Champy principles have approached each other, leading to more consensus on the optimal fracture fixation methods. The ideas of fracture fixation, the accurate preoperative imaging and the esthetic awareness of the patient have led to reconsideration of the optimal surgical approaches in CMF trauma.

The current opinion on the optimal diagnostic and therapeutic approach of the CMF trauma patient will be presented by a distinguished international faculty. Remaining controversies and new developments will be presented in the poster sessions and free lectures.

The participants are invited to upload their abstracts from September 1, 2015.

During the symposium you will get the chance to meet many colleagues from abroad. The compact university city of Groningen provides an excellent environment to join each other for the social part of the meeting.

After the conference the SORG-Academy will organise a hands-on cadaver course on “surgical approaches for CMF trauma” on Saturday, May 21, 2016.
