

Clinical Digital Photography for Surgeons, Doctors and Dentists

8-9 October 2015

RCS London

Clinical photographs are an extremely useful part of the clinical record in many areas of surgery and medicine. The ability to take, process and archive digital photographs is essential when hospital medical illustration departments may be unavailable or non-existent. This practical based course provides surgeons, doctors and dentists with the skills to produce accurate, high-quality digital photographs.

Course content includes:

- Basic techniques for clinical digital photography - cameras, lighting, composition
- Medico-legal aspects of clinical photography
- Archiving and storage
- Processing and storing images
- DSLR videoing

Who should attend?

All surgeons, doctors and dentists who would like to improve their knowledge and skills in digital clinical photography and SAS Grades.

Course Fee

£405

Course Director

Mr Steve Langton

Consultant Oral & Maxillofacial Surgeon
East Lancashire Hospitals

Delegate feedback

'Well done to the faculty for having put together a high quality instructional course that was delivered in an informal style that encouraged discussion and debate to the benefit of all candidates, no matter their level of expertise in the field of photography.'

At the end I felt inspired and equipped to achieve higher standards in clinical digital photography in future.'
