## **Masterclass Immediate Loading Procedures** **20 – 22 January 2016, Bruges, Belgium**

*Unique Full Arch Immediate Loading Protocol in both Fresh Extraction Sockets and Cranial Bone-Grafted Severe Atrophic Maxilla*

Attendance is limited to 7 participants.

A reliable and predictable immediate loading concept is presented for full arch rehabilitations in patients with a terminal dentition and in patients with an extreme atrophic maxilla.

The full protocol for immediate implant placement and loading, cranial bone grafting, immediate loading with provisional implants will be demonstrated in live surgery, live prosthetic sessions and in presentations. Live surgery will be performed in the OR of the General Hospital and in a private practice "Praktijk Tillegem". Live prosthetics will be performed in Praktijk Tillegem. Courses will be given in both venues.

The course fee 750 euro for trainees and 1500 euro for delegates. This fee also covers the evening programme.

For further information and registration (first come, first served basis) please contact:
