Overview

This three day fresh cadaver workshop covers the whole range of cranio-maxillofacial procedures with an UK based faculty that brings together expertise from maxillofacial, ophthalmic and ENT surgery and neurosurgery.

The short interactive lectures focus on current surgical techniques and outline the modern management of maxillofacial pathology in a multidisciplinary setting.

The operative surgery practice on fresh cadaveric material provides a realistic setting with close supervision with only two dissecting participants per operating table (one on each side)

The course is directed to maxillofacial surgery trainees during their central period of specialist surgical training.

Objectives

- To present a balanced multidisciplinary approach to the management of cranio-maxillofacial conditions
- To develop surgical skills necessary for interventions relevant to the cranio-maxillofacial area through cadaveric operative surgery practice

For further information and to request a registration form please contact:
Mr Liviu M Hanu-Cernat
Consultant Oral and Maxillofacial Surgeon
Department of Oral and Maxillofacial Surgery

Cranio-maxillofacial Operative Surgery Cadaver Workshops

6 – 8 April 2016
8 – 10 November 2016

Venue:
Surgical Training Centre
University Hospital Coventry,
UK

Three days hands-on operative surgery on fresh human cadaveric material with only one dissecting delegate per operating side.

Refreshments and lunches included.

Three day course:

£1200
dissecting delegate

£400
non-dissecting delegate

UK Faculty

BAOMS 21 CPD hours
EACMFs Rolling Programme

Day 1

Lectures:

- Orbital anatomy
- Approaches to the orbit and zygomatic area
- Dermal fillers and the use of Botulinum toxin
- Upper and lower blepharoplasty and lateral canthotomy
- Facial skin surgery

Operative surgery practice:

- Subciliary, transconjunctival and upper blepharoplasty approach
- Lateral Canthotomy, Cantholysis
- Orbital floor, inferior orbital rim and fronto-zygomatic area reconstruction
- Intraoral and Gillies' approach to the zygomatic bone
- Dermal fillers and botulinum toxin A infiltration
- Upper and lower blepharoplasty
- Facial skin flaps
- Wedge excision, Karapandjic and Abbe flaps

Day 2

Lectures:

- Surgical approaches for craniofacial trauma
- Overview of orthognathic surgical procedures

Operative surgery practice:

- Tracheostomy
- Coronal and pericranial flap
- Anterior craniotomy and cranialisation of the frontal sinus
- Lateral fronto-orbitotomy
- Harvesting calvarial bone grafts
- Surgically assisted rapid expansion SARPE
- Le Fort I Osteotomy
- Forward sliding sagittal split mandibular osteotomy

Day 3

Lectures:

- Temporomandibular Joint Surgery
- Surgical approaches to the fractured mandibular condyle
- Salivary glands surgical procedures

Operative surgery practice:

- TMJ arthrocentesis and arthroscopy
- Eminectomy and high condylar shave
- Transparotid, retromandibular and submandibular approaches to the condyle
- Removal of sublingual and submandibular salivary glands
- Superficial parotidectomy and principles of extracapsular dissection

Coventry Transport Museum

Tuesday 6 April and 8 November
18:30 Private Tour and Festive Course Dinner at the
Coventry Transport Museum £35

Coventry is the birthplace of the British motor industry.
Discover the fascinating story behind the development of
road transport from the earliest cycles to the fastest cars on
earth.
