

October 5 – 7, 2016
Prague, Czech Republic
Hotel Pyramida

Dear Colleagues,

After the successful World Tour Programs in 2008, 2010 and 2012, and after the unbeaten IFHNOS 5th World Congress in New York 2014, the IFHNOS is again proposing a global continuing medical education program featuring the most respected leaders in their fields.

We are very pleased to announce that this worldwide program spreading knowledge over three continents stops in **Prague, Czech Republic, October 5-7, 2016**. Prague is the only location of the IFHNOS Tour in central and west Europe.

The program will provide state-of-the-art knowledge and explore the frontiers of head and neck cancer diagnosis and treatment through introductory lectures; intense interactive discussions with regional specialists through case presentations and demonstrations of surgical techniques through video sessions.

Your kind assistance with the **promotion of the Prague World Tour 2016** in your country will be highly appreciated. Please spread the information about the venue among your colleagues and others in related fields of interest such as physicians involved in head and neck cancer care, otolaryngologists, and oncologists/radiotherapists.

We would also like to promote our IFHNOS tour at National Congress occurring within your country, for which we can offer reciprocal media exposure during our event.

We hereby also cordially invite all member organizations of your association to participate in the World Tour in Prague.

We expect great attendance from Europe, which provides a fantastic opportunity for interaction and communication between the local faculty, attendees and traveling faculty.

All necessary information about the Prague Tour can be found at <http://www.ifhnosprague2016.org/>.

Thanking you in advance and we look forward to our cooperation and your support of the IFHNOS World Tour 2016 in Prague!

Yours faithfully,

Professor Jan Klozar, MD
Host of the IFHNOS World Tour Prague 2016
Department of Otorhinolaryngology, Head and Neck Surgery
First Medical Faculty, Charles University in Prague
University Hospital Motol
