

Basic Surgical Anatomy of the Head and Neck

This highly popular course will provide you with a comprehensive analysis of the applied surgical anatomy of the head and neck with an emphasis on clinical relevance. The course is structured to enable far greater active participation at a number of interactive practical work stations using specimens.

Course content includes

- Applied anatomy of the scalp and face
- Orbital and interorbital anatomy in trauma
- Infratemporal & pterygopalatine fossae
- Applied anatomy of the External and Middle Ear

Delegate feedback

'One of the best courses I have been on, excellent revision of head and neck anatomy. The faculty were supportive and helpful.'

'As an ST3 in OMFS, this course was excellent for revision and I picked up some great tips from the faculty, who were all brilliant. Thank you.'

Who should attend?

CT1-2, ST3-5 and SAS Grades
