

Course Announcement

AOCMF European Forum and the 6th AOCMF Advanced Course on Orbital Reconstruction May 19–21, 2016, Birmingham, United Kingdom

The Forum and Course bring together leading experts in the field of orbital reconstructive surgery for three days of learning, exchange of opinions, debate, and practical exercises. Strong emphasis is given to workflow optimization for reconstructing complex orbital defects and deformities created by malignancy or trauma. This includes preoperative imaging analysis, virtual modelling, the prefabrication of guides and implants, and the use of intraoperative navigation and intraoperative imaging.
