

HANDS-ON CADAVER INTENSIVE COURSE IN ORTHOGNATHIC SURGERY AND ANCILLARY PROCEDURES

The treatment of dento-maxillofacial deformity with orthognathic surgery has undergone a profound revolution during the last years. The reach - and hence the objectives - of this kind of surgery have been redefined to cover three basic pillars: the correction of the underlying malocclusion and skeletal base discrepancy, upper airway management, and harmonization of facial esthetics. This hands-on course aims to provide participants with a comprehensive practical overview of all techniques of the orthognathic surgery spectrum, including ancillary procedures to optimize esthetic results.

FACULTY

Coordinación

Dr. Federico Hernández Alfaro

Dra. Raquel Guijarro

Profesorado

Dr. Federico Hernández Alfaro

Dra. Adaia Valls

Dra. Marian Lorente

Dra. Raquel Guijarro

Dr. Samir Aboul-Hosn

Dr. Rodrigo Pallars

PROGRAMME

Clinical anatomy

Accelerated orthodontics:

- Corticotomies

Maxillary osteotomies:

- One-piece LeFort I osteotomy
- Segmented (three- or four-piece) Le Fort I osteotomy
- SARPE
- Minimally invasive protocol: "Twist technique"

Mandibular osteotomies:

- Sagittal split osteotomy
- Anterior segmental osteotomy (frontblock)
- Genioplasty
- Chin wing

Malar osteotomies:

- Sandwich osteotomy

Ancillary procedures:

- Rhinoplasty
- Bichat buccal fat pad transposition
- Facial liposculpturing techniques

INFORMATION

Dates

May 5th-6th, 2016

Schedule

Thursday and Friday from 9:00am to 8:00pm

Price

3.000 €
