Who should attend

This course is designed for surgical specialists beginning their career in TMJ and mandibular condylar process traumatology, as well as for experienced surgeons wishing to refine their surgical skills. Despite of the differentiation between open vs. closed reduction, the participants will gain a practical insight of the most important access procedures to condylar process fractures and the most important types of osteosynthesis.

Course Aim

- Detailed knowledge on the functional anatomy of the TMJ
- Discussion of current concepts on mandibular condylar process traumatology
- Demonstration of important approaches on cadavers including video transmission
- Hands-on repetition and discussion of the most important accesses in the Institute of Anatomy

Course Language

English, no simultaneous translation will be offered.

EACMFS Accreditation

This course is pending for CME credit points.
