## EUROPEAN ASSOCIATION FOR CRANIO-MAXILLO-FACIAL SURGERY

*long version*

### International comprehensive surgical training courses for Cranio-Maxillo-Facial oncology

accompanying the 24<sup>th</sup> congress of the  
European Association for Cranio-Maxillo-Facial Surgery

#### Including courses for:

**1. Stepwise Flap Raising**

Precongress Course Aachen, 13.09. – 15.09.2018

**2. Trans-facial Access**

Precongress Course Munich, 15.09.2018

**3. Neck Dissection**

Precongress Course Munich, 16.09.2018

**4. Microsurgery**

Precongress Course Munich, 16.09. – 17.09.2018

**5. Raising of Perforator Flaps**

Postcongress Course Berlin, 27.09. – 29.09.2018

Dear Colleagues,

as president of the European Association for Cranio-Maxillo-Facial Surgery (EACMFS) I am honoured to offer you a comprehensive surgical training course for Cranio-Maxillo-Facial oncology.

My team and I look back on an experience of more than 50 courses during the last 20 years with more than 1.000 participants from 45 different countries. We aim to provide a wide practical scope in oncological and reconstructive surgery accompanying the 24<sup>th</sup> congress of the EACMFS.

We will run five courses in total, providing a complete education in basic and advanced oncology and reconstructive surgery for head and neck patients.

The content of the first course is stepwise raising of microvascular flaps. As a special feature we provide pulsatile flaps, which mimic arterial blood flow in the cadavers for a more realistic surgical experience.

The second and third courses include a systematic and stepwise approach to neck dissection and different surgical approaches to distinct facial structures. The intention is to allow the participant to acquire a basic head and neck surgical armamentarium.

Microsurgery is the fourth course offered. Participants will learn to conduct arterial and venous anastomosis, which is essential to perform complex reconstructions successfully. In addition, they will learn nerve co-aptation.

Last, but not least, we offer a special course (No. 5) for raising microvascular perforator flaps. They have become more evident in microvascular surgery during the last decade and provide a wide range of sizes and shapes and lead to good aesthetic and functional outcome in reconstructive surgery. Our unique pulsatile feature is also available in this course and enables realistic flap raising.

All the courses can be booked apart or as a package and are certified by the German General Medical Council.

In summary, we are glad to provide courses covering all the essential steps for successful oncological and reconstructive surgery and welcome you cordially!

Sincerely yours
