# Concepts and Controversies in Antiresorptive Drug-related Osteonecrosis of the Jaw (ARONJ)

**April 20–21, 2018   Prague, Czech Republic**

**COURSE DIRECTOR**  
**Sven Otto**  
(Munich, DE)

**COURSE CHAIRS**  
**Lynne Fryer**  
(Torquay, UK)  
**Risto Kontio**  
(Helsinki, FI)

**GUEST SPEAKER**  
**Robert Marx**  
(Miami, US)

### Course description

A combination of lectures, small group discussions, and panel discussions over one and a half days. The expert faculty focus on the practical application of evidence and expert opinion in clinical practice, covering both nonoperative and operative treatment options. Participant and faculty interaction and active discussions in both the plenary and small groups are key features of the educational methods used in this event.

### Learning objectives

- Diagnose ARONJ and its different stages
- Prevent ARONJ before and during antiresorptive treatment
- Decide on suitability of nonoperative treatment
- Decide, plan, and perform appropriate operative treatment, including management of soft tissue
- Plan the oral rehabilitation
- Describe the potential future use of antiresorptive drugs in oral and maxillofacial surgery

### Target participants

Oral and maxillofacial surgeons, maxillofacial surgeons, oral surgeons, dentists, oncologists, and osteologists.

### Regional faculty

Thomas Kofod, Copenhagen (DK)  
Alberto Bedogni, Padua (IT)  
Alexandre Assaf, Hamburg (DE)  
Stefano Fedele, London (UK)  
Robert Gassner, Innsbruck (AT)

### Course venue

Vienna House Diplomat Prague

# AOCMF European Forum in Prague

## April 20–21, 2018

### Concepts and Controversies in Antiresorptive Drug-related Osteonecrosis of the Jaw (ARONJ)

## PROGRAM AT A GLANCE

#### Guest speaker

**Robert Marx**  
(University of Miami  
Miller School of Medicine,  
Miami, US)

#### Goal of the course

To improve prevention, diagnosis, treatment and rehabilitation in osteonecrosis of the jaw with antiresorptive drugs (ARONJ) and enhance quality of life.

#### Program modules

- Introduction and prevention
- Treatment options
- Rehabilitation

#### Topics

- Pathogenesis
- Prevention
- Risk factors
- Imaging
- Nonoperative treatment options
- Operative treatment options
- Surgical aspects of dental rehabilitation
- Dental implants
- Pros and cons of drug holiday
- Pros and cons of microvascular reconstruction
- Complex cases and cases with complications
- Future potential applications of antiresorptive drugs in craniomaxillofacial bone lesions

#### Course venue

Vienna House Diplomat Prague  
[www.viennahouse.com](http://www.viennahouse.com)

#### Contact

Lilian Rubin: [rubin.lilian@ao-courses.com](mailto:rubin.lilian@ao-courses.com)
