## Faculty

Alfred G. **Becking**, Amsterdam, The Netherlands  
 Leander **Dubois**, Amsterdam, The Netherlands  
 Harald **Essig**, Zurich, Switzerland  
 Raquel **Guijarro-Martinez**, Valencia, Spain  
 Piet **Haers**, London, United Kingdom  
 Jürgen **Hoffmann**, Heidelberg, Germany  
 Peter **Kessler**, Maastricht, The Netherlands  
 Florencio **Monje**, Badajoz, Spain  
 Andreas **Neff**, Marburg, Germany  
 Marloes **Nienhuijs**, Nijmegen, The Netherlands  
 Francine **Ryba**, London, United Kingdom  
 Nadeem **Saeed**, London, United Kingdom  
 Henning **Schliephake**, Göttingen, Germany  
 Gwen **Swennen**, Bruges, Belgium  
 Hendrik **Terheyden**, Kassel, Germany

## Course Purpose

Minimally invasive surgery is the key to decrease patient morbidity in all fields of surgery. The purpose of this course is to provide an overview of current state-of-the-art minimally invasive techniques in CMF surgery.

## Target Group

The course is designed for trainees and specialists in cranio-maxillofacial surgery interested in the grade of penetration of minimally invasive techniques in the most commonly encountered areas of the specialty. The combination of theory and interactivity will allow for intensive discussions and maximum benefit.

## Program

Thursday, January 16<sup>th</sup>, 2020

08:00 – 08:30	Registration	
08:30 – 08:45	Welcome	<i>Saeed, Swennen</i>
<b>Session 1: MI Orthognathic Surgery</b>		
08:45 – 09:15	Minimally invasive techniques in orthognathic surgery	<i>Guijarro-Martinez</i>
09:15 – 09:45	The “MI Orthognathics” concept and MI-PSI’s	<i>Swennen</i>
09:45 – 10:15	<b>Panel Questions 1</b> Condylectomy – intraoral or extraoral?  Does 3D virtual orthognathic planning minimize patient morbidity?  How crucial is hypotensive anaesthesia and postoperative care?	<i>Becking, Neff</i>
10:15 – 10:45	<b>Coffee break</b>	
<b>Session 2: MI Traumatology and TMJ</b>		
10:45 – 11:15	How to decrease patient morbidity in midfacial trauma?	<i>Dubois</i>
11:15 – 11:45	TMJ minimally invasive surgery, is it worth it?	<i>Monje</i>
11:45 – 12:15	<b>Panel Questions 2</b> Is minimally invasive surgery in midfacial trauma management possible without intra-operative imaging and does navigation or endoscopically assisted surgery can reduce complications?  How is timing influencing the clinical decision making in management of midfacial fractures and extensiveness of the treatment?  Will interventional minimally invasive arthroscopy really become a standard tool in the future?	<i>Neff, Essig</i>
12:15 – 13:00	<b>Lunch</b>	

<b>Session 3: MI Preprosthetic and Oncological Reconstruction</b>	
13:00 – 13:30	New dental implant concepts for preprosthetic reconstruction of the severe atrophic jaw <i>Terheyden</i>
13:30 – 14:00	Minimally invasive treatment strategies in oncological treatment and reconstruction <i>Schliephake</i>
14:00 – 14:30	<b>Panel Questions 3</b> <i>Hoffmann</i> PSI’s versus augmentative bone grafting with respect to the pitfalls?  Limitations of PSI’s (titanium or PEEK) in irradiated patients?  Lymph node dissections: Still obligatory or therapeutic overkill?
14:30 – 15:00	<b>Coffee break</b>
<b>Session 4: MI Salivary Glands, Cleft and Craniofacial</b>	
15:00 – 15:30	Endoscopic salivary gland surgery – minimally invasive. What is its role? <i>Ryba</i>
15:30 – 16:00	New minimally invasive concepts in cleft surgery? <i>Haers</i>
16:00 – 16:30	Endoscopic techniques in craniosynostosis reconstruction. <i>Nienhuijs</i>
16:30 – 17:00	<b>Panel Questions 4</b> <i>Kessler</i> Does endoscopic salivary gland surgery lead to gland preservation?  Can bone harvesting in cleft surgery be performed less invasive?  Open versus endoscopically assisted - what is the influence on future craniofacial growth?
17:00	<b>Closing Remarks and Farewell</b>
