

## Aim and Content of the Course

As it is well known that the success of demanding surgical procedures like tumor resection and primary reconstruction using microvascular flaps depends not only on individual skills but also on a reasonable holistic treatment concept, for the first time we offer the **missing link between separate procedures and comprehensively teach how to perform and organize complex oncological operations step-by-step.**

The focus of this course lies with practical exercise under realistic conditions. It is designed for surgeons who already have basic experience in microsurgical reconstruction and oncologic procedures and want to perform this independently under professional guidance. The course is designed to infect its participant with the virus of contentedness and joy to perform oncological procedures on the highest level for the benefit to their patients.

## Program

- » The course is the missing link between individual courses for oncological resection and neck dissection, microsurgical techniques and flap raising
- » Personal step by step training of the most important oncological procedures, microsurgery and flap raising
- » Conditions for neck dissection and flap raising will be similar to those of the living human body due to the embalming technique according to Thiel
- » Flap raising and reconstruction under pulsatile conditions
- » Indications for typical surgical procedures in oncology are demonstrated and interventions are performed by the participants
- » Teaching according evidenced based guidelines
- » Honest discussion of benefits and risks of microsurgical reconstruction over 3 days of highly interactive teaching with very experienced instructors

## Organisation and Registration

### Course Chairman

**Univ.-Prof. Dr. Dr. Frank Hölzle**  
**MD DDS PhD FEBOMFS**

Head of Department of  
Oral and Maxillofacial Surgery  
Uniklinik RWTH Aachen  
[www.mkg-chirurgie.ukaachen.de](http://www.mkg-chirurgie.ukaachen.de)  
Executive Officer EACMFS  
Executive Officer UEMS OMFS (EU)

### Senior Course Chairman

**Univ.-Prof. Dr. Dr. Klaus-Dietrich Wolff**

Head of Department of  
Oral and Maxillofacial Surgery  
Technische Universität München  
Klinikum rechts der Isar  
[www.mkg.med.tu-muenchen.de](http://www.mkg.med.tu-muenchen.de)  
Past President EACMFS

### Course Chairman

**Mr. D. A. Mitchell**

MBBS BDS FDSRCPS (Glasg)  
FDSRCS (Eng) FRCS (Ed)  
FRCS (Eng) FRCS (OMFS)  
Former Editor of British Journal  
Oral and Maxillofacial Surgery  
Author: An introduction to Oral and  
Maxillofacial Surgery

### Course secretaries

**Ruth Lennartz/Nicole Bataille**

Uniklinik RWTH Aachen  
Pauwelsstraße 30  
52074 Aachen  
Phone: +49 241 80-88246  
Fax: +49 241 80-82430

**UNIKLINIK**  
**RWTHAACHEN**

Department of Oral and  
Maxillofacial Surgery

Comprehensive Course on tumor resection and microvascular reconstruction

# 1<sup>st</sup> International CONTRAST Course

5<sup>th</sup> - 7<sup>th</sup> October 2022  
in Bochum

with perfused and pulsatile flaps

Verification of anastomoses with ICG Video-angiography

## Date

Wednesday 5<sup>th</sup> October until Friday 7<sup>th</sup> October 2022

## Course Language

English

Textbook „Raising of Microvascular Flaps, 3rd Ed.“  
by K.-D. Wolff & F. Hölzle available on the course

## Location

### KAFFZ, Institute of Anatomy

Ruhr-Universität Bochum  
Universitätsstraße 150  
Building MA, 44801 Bochum, Germany

## Accommodation

[www.eventhotels.com](http://www.eventhotels.com) – [www.bochum.de](http://www.bochum.de)

A room with reduced fees at the Mercure Hotel, Bochum City is available. For reservation please call +49 234 969-0

**keyword: Universität Bochum**

## Course Fee

2.000 Euro

Registration required in advance

We only require 50% of course fee to be paid on registration and the remaining 50% until 24<sup>th</sup> August 2022 to the following bank account:

RWTH Aachen/Prof. Hölzle, Sparkasse Aachen  
BIC: AACSD33 - IBAN: DE53390500001070938897  
Please indicate: „**1<sup>st</sup> CONTRAST Course**“

## Add ons

- » Possible complications in H&N tumor surgery: avoidance and handling
- » Perioperative management
- » Verification of anastomoses with IndoCyanine Green (ICG) Videoangiography
- » Safety net procedures

## Program

Wednesday, 5<sup>th</sup> October , 09:00 a.m. – 06:00 p.m.

- Introduction and Performing Neck dissection (Level I-III) and hemiglossectomy
- Introduction and Raising radial forearm flap
- Introduction and performing anastomoses radial artery to superior thyroid artery end-to-end and comitans radial vein to internal jugular vein end-to-side
- Introduction and reconstruction of the tongue
- Closure of the donor site via curved V full thickness skin graft

Thursday, 6<sup>th</sup> October , 09:00 a.m. – 06:00 p.m.

- Introduction and Performing Neck dissection (Level IV and V) and resection of ramus and corpus of mandibula (L-defekt according to Jewer's Classification, 1989)
- Introduction and Raising of fibula flap
- Introduction and performing anastomoses peroneal artery to facial artery end-to-end and one peroneal vein to internal jugular vein end-to-side and second peroneal vein to undefined recipient vein end-to-end
- Introduction and reconstruction of the mandible
- Closure of the donor site with full thickness skin graft from the groin

» The course is certified by the General Medical Council.

» Thursday evening course dinner (included in course fee)

» The course is included in the EACMFS Educational Rolling Programme. A refund of 300 Euros is available for each EACMFS Trainee member attending this course.

## Program

Friday, 7<sup>th</sup> October, 09:00 a.m. – 06:00 p.m.

- Introduction and Performing radical neck dissection (leaving only internal carotid artery and protecting transversa cervical vessels)
- Resection of cheek skin and parotidectomy preserving the facial nerve
- Introduction and raising of anterolateral thigh flap (selectively with primary thinning)
- Introduction and performing anastomoses of the descending branch of lateral circumflex artery to transverse cervical artery end-to-end and vein to transverse cervical vein end-to-end
- Introduction and reconstruction of the cheek
- Closure of the donor site primarily
