About i-Face

What is i-Face ?

We extend a warm welcome to attend our “Integrated Facial Aesthetic Surgery Congress and Exhibition (i-Face)” which will take place during June 2 - 5, 2022 in Istanbul, Turkey. This event is the key forum to present research to an interdisciplinary and international audience and will provide a unique platform to unite world’s best professionals in the field of facial aesthetic surgery practices. i-Face aims to gather visionaries through the presentations and to provoke current strategies in facial aesthetic and plastic surgery field. i-Face offers a brilliant opportunity for researchers of this field to exchange technical information and network with colleagues.

Outstanding features of this conference:

i-Face provides a global platform for all surgeons who perform various types of facial aesthetic surgeries on head, face, and eyes to get new insights in new techniques of facial aesthetic and plastic surgery field. The keynote lectures and plenary presentations, from senior scientists/industry experts along with professional panel discussions will update you on the latest discoveries, strategies and methodologies of this field. i-Face also includes workshops/exhibitions with career development programs.

Why i-Face ?

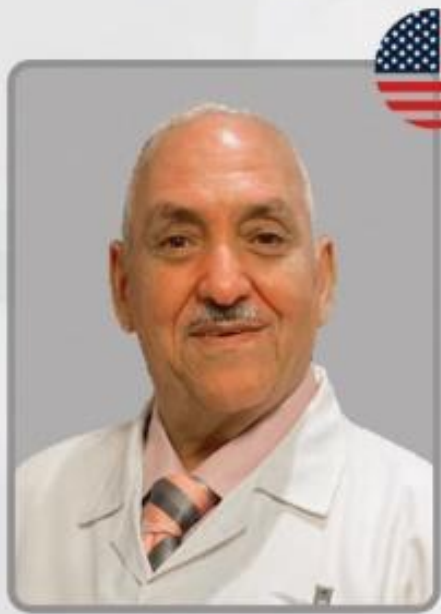

This 4-day occasion is a unique chance to interact with world renowned speakers who are internationally respected for their novel research and clinical achievements. i-Face will update you on the latest developments in the field of facial aesthetic and plastic surgery. Audiences will receive a name acknowledgment at this 4-day occasion. In addition to attending the conference, we invite you to experience Istanbul, the beautiful and famous city of Turkey, which attracts people from all around the globe.

Target audience:

Oral and Maxillofacial Surgeons/ Cosmetic and Plastic Surgeons/ Otorhinolaryngologists/ General Surgeons/ Dermatologists/ Ophthalmologists/ Aesthetician / Aesthetic Therapist/ *Periodontists/ *Dentists (Implantologists)

*we have considered separate courses for periodontists and dentists attending this event. They won't be allowed to participate in facial courses

Welcome to Istanbul !

From the executive and scientific committees, I would like to send my warmest regard and welcome to you for joining us at the inaugural i-Face (Integrated Facial Aesthetic Surgery Congress and Exhibition) in Istanbul, Turkey. We eagerly and diligently claim/promise that this meeting/session will be an exciting and innovative gathering of experts from around the world with a collective interest in facial cosmetic surgery. Keynote presentations on rhinoplasty and Face lifting by world renowned surgeons from various specialties, will be the cornerstone of this congress. Multiple other topics related to minimally-invasive and traditional facial aesthetic surgery will be highlighted followed by the opportunity to attend various workshops and hands-on demonstrations. After experiencing a difficult pandemic which has affected all of us, with an accompanying restriction on scientific meetings we are excited to have the opportunity to resume these endeavors with respected colleagues and friends. i-Face promises to provide a new approach to facial aesthetic surgery by incorporating surgeons with different techniques and surgical backgrounds from all corners of the world, but with the common principles of providing the most contemporary and effective facial cosmetic surgery. I sincerely hope to see you in Istanbul! Sincerely yours.

Dr. S. Omid Keyhan
OMFS
Scientific Chairman

Dr. Hamid Reza Fallahi
OMFS
Executive Chairman

Welcome to Istanbul !

Dear colleagues and friends, It is our honor to hold the first international event of the Maxillofacial Surgery, Implantology and Biomaterial Research Foundation in June 2022 in Turkey Istanbul. i-Face (Integrated Facial Aesthetic Surgery Congress and Exhibition) is an interdisciplinary and internationally event. We hope to discuss the latest methods, horizons, and evidences with the presence of the legends of Facial Cosmetic Surgery, Maxillofacial Surgery, Reconstructive Surgery, Oral Surgery, and Implant Surgery. The program includes challenging and extraordinary lectures, live surgeries, and advanced hands-on courses for participants. Undoubtedly, the opportunity of our presence in Turkey will make it possible to learn and exchange views with the medical dignitaries of that country closely. Eventually, we hope to be a competent host for all of you dear ones by launching a special program. Beauty is a subjective issue with respect to natural results, "The Essence of Facial Beauty" is our slogan. We are waiting for your valuable presence with best wishes.

About Maxillogram

The Maxillofacial Surgery, Implantology, and Biomaterial Research Foundation (MSIBRF) is a non-profit professional organization representing a significant number of Oral and Maxillofacial Surgeons, Dentists, and Other Renowned Surgeons and Scientists from numerous other disciplines all over the world, supports its members ability to practice their specialty through research, education, and innovation. Since its founding in 2020, the MSIBRF foundation has been evolving its field of activities through the publication of numerous articles and books, holding training courses, and cooperation with scientific communities, institutes, and technology start-ups and continues to expand its portfolio of programs with the on-going support from its directors and members. The mission of MSIBRF is to develop patient care-related concepts by advancing, promoting, supporting, and preserving the skill, competency, and professionalism of its members. The MSIBRF foundation is committed to shaping the future based on its insight. We believe and work hard to ensure that the foundations experiences, achievements, advances, collaborations, and leadership can play a significant role in the development of science and the training of outstanding practitioners and scientists.

About Courses

The hands-on/live presentation courses are taking place during 2 to 5 June 2022. The courses are twofold: Facial Aesthetic Surgery Courses and Advance Aesthetic Dentistry and Oral Plastic Surgery Courses. All courses are highly practical and hands-on oriented (accompanied by lectures, technique-explanation and live surgeries). Four courses conducted on human cadaver heads and six practical courses are conducted using animal cadaver models. Only a limited number of 15 - 20 delegates will participate in each hands-on course. There is no limitation on live presentations.
