COURSE PRESENTATION

We are pleased to announce this unique, Hands-On, MasterClass in Orthognathic Surgical Techniques.

This training experience is totally focused on the needs of the participants who, over the course of 2 intensive days, will have the opportunity to practice the most up-to-date and advanced techniques in surgical treatment of dentofacial deformities and ancillary procedures.

In the Cadaver Lab, each pair of participants, working with their own cadaver and following a step-by-step approach, will be encouraged to acquire the necessary skills to perform such surgery with complete autonomy in the future.

LEARNING OBJECTIVES >> KNOWLEDGE AND SKILLS TO DEVELOP

- >> Orthognathic Surgery as the core of integral orthofacial surgery concept.
- >> Emphasize the role of new technologies in dentofacial deformities diagnosis, planning and treatment.
- >> Incorporate different contemporary orthofacial surgical techniques.
- >> Make an update on the latest advances in this field.

TARGET AUDIENCE

Trainees and specialists in Maxillofacial Surgery with a special interest in the surgical treatment of dentofacial deformities who seek to update and deepen their knowledge in diagnosis, planning and orthognathic surgical techniques and ancillary procedures.

The admission of candidates with other credentials will be at the decision of the board of instructors.

ATTENDANCE REQUIREMENTS

100% attendance is mandatory for issuing attendance certificate and CME credits and/or ECTS
