

Meet the Experts

# Debates in Dental Implantology

Aalborg, Denmark

March 1-2, 2024

Pending for CME Credit Points

English

€ 490,- / € 390,-  
Including social  
get-together dinner

# Aim of the Course

Oral rehabilitation with implant-supported prosthesis has become a common treatment for partial or complete edentulism.

However, the placement of implants in an optimal position is frequently compromised due to atrophy of the alveolar process.

Therefore, alveolar ridge augmentation and soft tissue grafting are often necessary to improve long-term implant success.

This comprehensive implant course will provide participants with the current knowledge of various techniques for alveolar ridge augmentation and soft tissue grafting as well as treatment alternatives to minimize morbidity associated with established harvesting procedures.

# Program

## Day 1 – Friday, March 1, 2024

- Autogenous Bone Graft versus Bone Substitutes for Alveolar Ridge Augmentation
- Socket Preservation, Immediate Implant Placement or Delayed Implant Placement?
- Implant Placement in the Esthetic Region
- Soft Tissue Grafting in Conjunction with Implant Placement

### Social Activities

Social get-together with 3-course dinner at the Kunsten Museum in Aalborg  
(included in the mentioned course fees)

## Day 2 – Saturday, March 2, 2024

- Can Osseointegration be improved?
- Prosthetic Rehabilitation of the Partially or Totally Edentulous Atrophic Posterior Mandible
- Prosthetic Rehabilitation of the Partially or Totally Edentulous Atrophic Posterior Maxilla
- Patient Satisfaction with Implant Treatment and Handling of Complications
