Academic Medicine Course in Artificial Intelligence & Research Driven Precision Dental Medicine

Applications are now open for our Academic Medicine Course in Artificial Intelligence & Research Driven Precision Dental Medicine.

DATES

Sunday 19 – Saturday 25 July 2026

WHO IS THIS COURSE FOR?

This course is for senior dental academics at the level of assistant professor or higher, senior dental clinicians at the level of consultant or higher, senior dental researchers at the level of principal investigator, or senior policymakers in dental care related services.

COURSE DETAILS

The Course will take place at the Oxford Martin School Lecture Theatre and comprise ten 90-minute special lectures on various frontier topics of artificial intelligence and biomedical research in Dentistry, as well as three relevant academic visits in the UK. Attendees will stay at the Besse Building of St Edmund Hall. The Course is offered through the Oxford Chinese Economy Programme (OXCEP).

FEES

For further information and fees, please **email the course administrator**. A full scholarship is available to a qualified biomedical DPhil student who studies at St Edmund Hall or a professional member at Department of Oral and Maxillofacial Surgery, the John Radcliffe Hospital of the University of Oxford.
