

AO CMF Course–

Contemporary Master Techniques in Orthognathic Surgery, Planning and Advanced Technologies

March 11-12, 2027 Zürich, Switzerland

Course description

Advance your expertise in the management of complex dentofacial deformities through advanced planning, critical decision-making, and the selective use of contemporary technologies alongside world-leading experts.

This hands-on course explores topics such as facial asymmetry, transverse discrepancies, airway and temporomandibular joint considerations, surgery-first versus orthodontics-first approaches, relapse prevention, distraction osteogenesis, and advanced digital treatment planning. Gain practical insights and evidence-based strategies to support functional, aesthetic, and long-term treatment success.

Course objectives summary

After the course, you will be able to:

- Evaluate complex dentofacial deformities.
- Develop individualized treatment strategies.
- Compare surgery-first and orthodontics-first approaches.
- Apply advanced digital planning and 3D technologies.
- Manage TMJ, airway, and sleep apnea cases.
- Prevent and manage relapse.
- Identify indications for distraction osteogenesis.
- Contribute to multidisciplinary treatment planning.
- Understand the orthodontist's role throughout treatment.

Information

Standard ticket: CHF 1690 Member ticket: CHF 1521
Venue: Sheraton Zürich Hotel
Pfingstweidstrasse 100
Zürich 8005

Target participants

Experienced oral and maxillofacial surgeons, orthodontists and craniofacial clinicians who regularly manage orthognathic surgery patients and wish to refine planning, interdisciplinary decision-making and the use of advanced digital workflows. The course is not intended as an introduction to orthognathic surgery.
